TRANSITING REGULATIONS

- < **NE Multispecies GOM Rolling Closure Areas, GB Seasonal Closure Area, Western GOM Closure Area, Cashes Ledge Closure Area, Nantucket Lightship Closed Area, Closed Area I, and the EFH Closure Areas (unless otherwise prohibited):** Vessels may transit these areas during the closure periods, provided that the gear is stowed in accordance with the regulations summarized below.
- < **Closed Area II:** Vessels may not transit Closed Area II except for valid safety reasons, provided the operator has determined that there is a compelling safety reason and that fishing gear is stowed in accordance with the regulations summarized below.

GEAR STOWAGE REQUIREMENTS

To legally stow gear, a vessel must meet one or more of the following requirements:

Trawl Gear:

- C ***A net stowed below deck provided:*** It is located below the main working deck from which the net is deployed and retrieved; the towing wires, including the leg wires, are detached from the net; and it is fan-folded (flaked) and bound around its circumference.
- or
- C ***A net stowed and lashed down on deck, provided:*** It is fan-folded (flaked) and bound around its circumference; it is securely fastened to the deck or rail of the vessel; and the towing wires, including the leg wires, are detached from the net.
- or
- C ***On-reel stowage for vessels transiting the GOM Rolling Closure Areas and the GB Seasonal Closure Area -*** A net that is on a reel and is covered and secured, provided: the entire surface of the net is covered with canvas or other similar opaque material that is securely bound; the towing wires are detached from the doors; and no containment rope, codend tripping device, or other mechanism to close off the codend is attached to the codend.
- or
- ***On-reel stowage for vessels transiting the Western GOM Closure Area, Cashes Ledge Closure Area, Closed Area I, Closed Area II, and the Nantucket Lightship Closed Area -*** A net that is on a reel and is covered and secured, provided: the entire surface of the net is covered with canvas or other similar opaque material that is securely bound; the towing wires are detached from the net; and the codend is removed and stored below deck.
- or
- C ***Nets that are secured in a manner authorized in writing by the Regional Administrator.***

Scallop Dredges:

- C The towing wire is detached from the scallop dredge, the towing wire is reeled up onto the winch, and the dredge is secured and covered so that it is rendered unusable for fishing.

Hook Gear: (other than pelagic)

- C All anchors and buoys are secured and all hook gear, including jigging machines, is covered.

Sink Gillnet Gear:

- C All nets are covered with canvas or other similar material and lashed or otherwise securely fastened to the deck or rail, and all buoys larger than 6 inches (15.24 cm) in diameter, high flyers, and anchors are disconnected.
